*Work-life balance*

# Work–life balance necessary now and in the future

Keeping the balance between work and home life, between commitments and relaxation, we created a chair that fits all spaces. Our goal was to create a product that would fulfil the needs of anybody who balances their work and family life and needs convenient, comfortable, ergonomic and lightweight products in both of those areas.

# Ellie<sup>Pro</sup>

There are eight products in the family, all of which will fit into any interior, making it all the more beautiful. The chair, with its many configuration options, fashionable colours of the metal parts and unique shape of the seat, attracts your attention and fulfils all your needs. It is user-friendly and its form is modern, elegant and simple.

# Office vs home

Ellie<sup>Pro</sup> is a synergy of a simple form and functionality. It is both a comfortable, soft chair and an ergonomic office chair. The model with a four- or five-arm base will easily fit into any office or home.

Precision and attention to detail are particularly important in joining different colours of fabric. The optional leather insert on the armrests connected with the seat is both a unique and practical idea.

Piety.  
Simplicity.  
Possibilities

# Living room vs conference

Faced with the challenge of creating a chair that will function well both in the office and at home, we had to make sure it has a unique appearance and is functional. This was achieved, for instance, by fitting the product with a rod frame.

# Good does not have to mean complicated

One chair, two faces - the high and low backrests and the intuitive use of the Synchro Self mechanism with one lever. These solutions will satisfy even the most demanding of users.

Ellie<sup>Pro</sup> 20V3

Ellie<sup>Pro</sup> 10ST

# Wood - a timeless trend

The Ellie<sup>Pro</sup> with wooden legs is the best option for spaces where elegance is needed. This most refined and exquisite of materials will bring an element of luxury, whilst still looking solid.

A close-up photograph of a modern chair. The upper portion shows the seat and backrest, upholstered in a rich, textured red fabric. Below the seat is a gold-colored metal base consisting of four thin, slightly curved legs that converge at a central point. Each leg ends in a small, dark, circular foot. The background is a light, neutral color with a large, soft-edged white circle partially visible behind the chair. The lighting is soft and even, highlighting the textures of the fabric and the metallic sheen of the base.

The versatility, minimalism and functionality of the unique Ellie<sup>Pro</sup> chair combined with its distinctive design are a recipe for the perfect chair. Thanks to the wide range of fabric, two heights of the backrest and various types of bases in modern colours, this one product will help you arrange any space.

# Measurements

The measurements are approximate and can differ depending on the product configuration.  
 Measuring methodology is available at this link: [www.profim.eu/Measuring\\_methodology.pdf](http://www.profim.eu/Measuring_methodology.pdf)

\* Seat height is measured according to PN EN 1335-1 norm (with seat burden).

\*\* Seat height is measured according to PN EN 16139 norm (with seat burden).

# Profim and the Environment

In our operation we follow the sustainability principle. We operate in a responsible manner for the benefit of our customers, employees, suppliers, and the local community, but we always respect the environment.

In order to achieve our goals, we have implemented Environmental Management System based on the ISO 14001 standard, which allows for a comprehensive approach to ecology. We take into consideration and evaluate the way Violle products affect the environment during their entire life cycle.
